EDUCATION

B.Sc. Computer Science

Unisinos

Feb 2026 – Present · RS, Brazil

LANGUAGES

Portuguese Native

English Fluent

Spanish Intermediate

SKILLS

LANGUAGES

Python · Java · C · C++ · JavaScript · SQL

FRAMEWORKS

Spring Boot · Django · Flask · Discord.py

AI / ML

LLM APIs · scikit-learn · DecisionTree · RandomForest

DEVOPS & INFRA

Docker · GitHub Actions · CI/CD · Git · Linux

DATABASES

MySQL · JPA / Hibernate

COURSES

Java Marathon – Java Virado no Jiraya

Python Mundo 1, 2 e 3 – Curso em Video

HTML5 & CSS3 – Curso em Video

DevOps · Imersao Python – Alura

HDSE Leadership – Lehigh University

PROFESSIONAL SUMMARY

Back-end developer with 2+ years building systems in Python and Java. Co-founder of one of **Brazil's top-6 largest programming communities** (18k+ members). Experience with CI/CD, REST APIs, generative AI agents, and ML models. Currently pursuing a Bachelor's in Computer Science at Unisinos. Fluent English --- ready to work with international teams from day one.

PROFESSIONAL EXPERIENCE

Co-founder & Back-End Developer

Server of Programmers

Jun 2022 – Present · Remote

- Co-founded and scaled one of **Brazil's top-6 developer communities on Discord**, growing to 18k+ members.
- Built **AI bots** with Python & Discord.py for moderation, onboarding, and automated support.
- Organized events with sponsors **Alura, Shard Cloud, Hostinger**; coordinated live sessions.
- Maintained **CI/CD pipelines** via GitHub Actions for automated testing and continuous deployment.

TECHNICAL PROJECTS

Embedding-Based Prompt Clustering -- Dell

[Python](#) · [UMAP](#) · [HDBSCAN](#) · [PaCMAP](#) · [LocalMAP](#) · [scikit-learn](#)

Comparative study of 6 clustering pipelines (K-Means, UMAP, PaCMAP, LocalMAP, densMAP + HDBSCAN) on real support data, with statistical validation (trustworthiness, DBCV) grounded in the scientific literature and an interactive analysis dashboard.

[github](#)

AI Technical Support Agent

[Python](#) · [LLMs](#) · [OpenAI GPT-4o](#) · [RESTful APIs](#)

Autonomous AI agent for first-line technical support. Integrates GPT-4o for contextual resolution without human escalation.

[github](#)

CI/CD Pipeline in Python

[Python](#) · [GitHub Actions](#) · [Docker](#) · [Flask](#)

Full CI/CD pipeline: automated tests on every push, Docker deploy on success. Production-ready DevOps practices.

[github](#)

Generative AI Discord Bot

[Python](#) · [Discord.py](#) · [Open-source LLM API](#)

Discord bot with open-source generative AI for real-time community support, with multi-turn context.

[github](#)

Real Estate Price Prediction -- Sao Paulo

[Python](#) · [scikit-learn](#) · [Decision Tree](#) · [Random Forest](#)

ML regression system predicting property values in Sao Paulo. Compares Decision Tree and Random Forest with feature-importance analysis.

[github](#)

CRUD REST API -- Django & SQL

[Python](#) · [Django](#) · [REST Framework](#) · [MySQL](#)

Full REST API with Django + MySQL: data validation, DTO patterns, and structured error handling.

[github](#)

People Registration API -- Java

[Java](#) · [Spring Boot](#) · [JPA](#) / [Hibernate](#) · [Spring Web](#)

RESTful Spring Boot service for user registration with JPA, clean REST controllers, and ORM persistence.
